

## CSL

The Cube wall sconce and ceiling-mount fixture bring geometric detail to architectural lighting applications.

The series has a powerful 18-watt LED 120V light engine, 1260 lumen output, and is UL/cUL-listed for damp or wet locations. It works with an incandescent dimmer and can be ordered in Bronze, Satin Aluminum, and White finishes.

## HOLTKÖTTER INT'L

The innovative Model 9520 LED-powered wall sconce is comprised of two aluminum reflectors (concealing the light source) that can be rotated to position illumination precisely where needed. The aluminum reflector may be specified in either a Polished or a Brushed Aluminum finish. The fixture provides full-range dimming down to less than 1 percent and has a color temperature of 2700K.

## MODERN FORMS

The Rhythm sconce offers a stepped detail within an organic ring form and is indirectly illuminated with a concealed LED source. It is hand-crafted using a lost wax casting technique called cire perdue and paired with LED technology. This ADA-compliant design utilizes an electronic low-voltage dimmer and offers 3000K correlated color temperature (CCT) and a 50,000-hour rated life. It consumes 9 watts and measures 6" high x 9" wide.
