

LEDucation PREVIEW

Get a taste of new LED products you'll see at the 10th anniversary of the event, March 29-30 in New York City at the New York Hilton Midtown hotel.

1. MaxLite Plug-and-Play LED Lightbars are a versatile, energy-efficient alternative to linear fluorescent and halogen lamps for applications such as cove, cabinet and display lighting. The company's new generation of lightbars offers a 20 percent improvement in efficacy and an expanded dimming range that lowers to 5 percent of full light output. In addition, they're certified by Energy Star® and listed by DesignLights Consortium (DLC), making them eligible for rebates from utility programs. www.maxlite.com

2. CSL Hex, available in two sizes, is a smart, geometric fixture featuring warm, diffused illumination encased in a multicolored, six-sided shape. The hexagonal fixture comes in stamped aluminum housing with a molded acrylic lens/diffuser and is offered in a multitude of finishes for both the housing and the inner accent color. The dimmable, ADA-compliant wall and flush mount is UL/cUL-listed for damp or wet locations. www.csllighting.com

3. Jesco Lighting The chip-on-board LED Track Lighting Collection features the highest-power L516 model, which offers up to 3,773 lumens and is an ideal, energy-efficient substitute for the standard 70W PAR38 ceramic metal halide lamp source. The small-scale L516 is available in black or white finishes and in three sizes. Field-replaceable optics allow for a selection of beam angles, color temperatures and CRI options. www.jescolighting.com
