

# CSL | ACROBAT DOWNLIGHTS

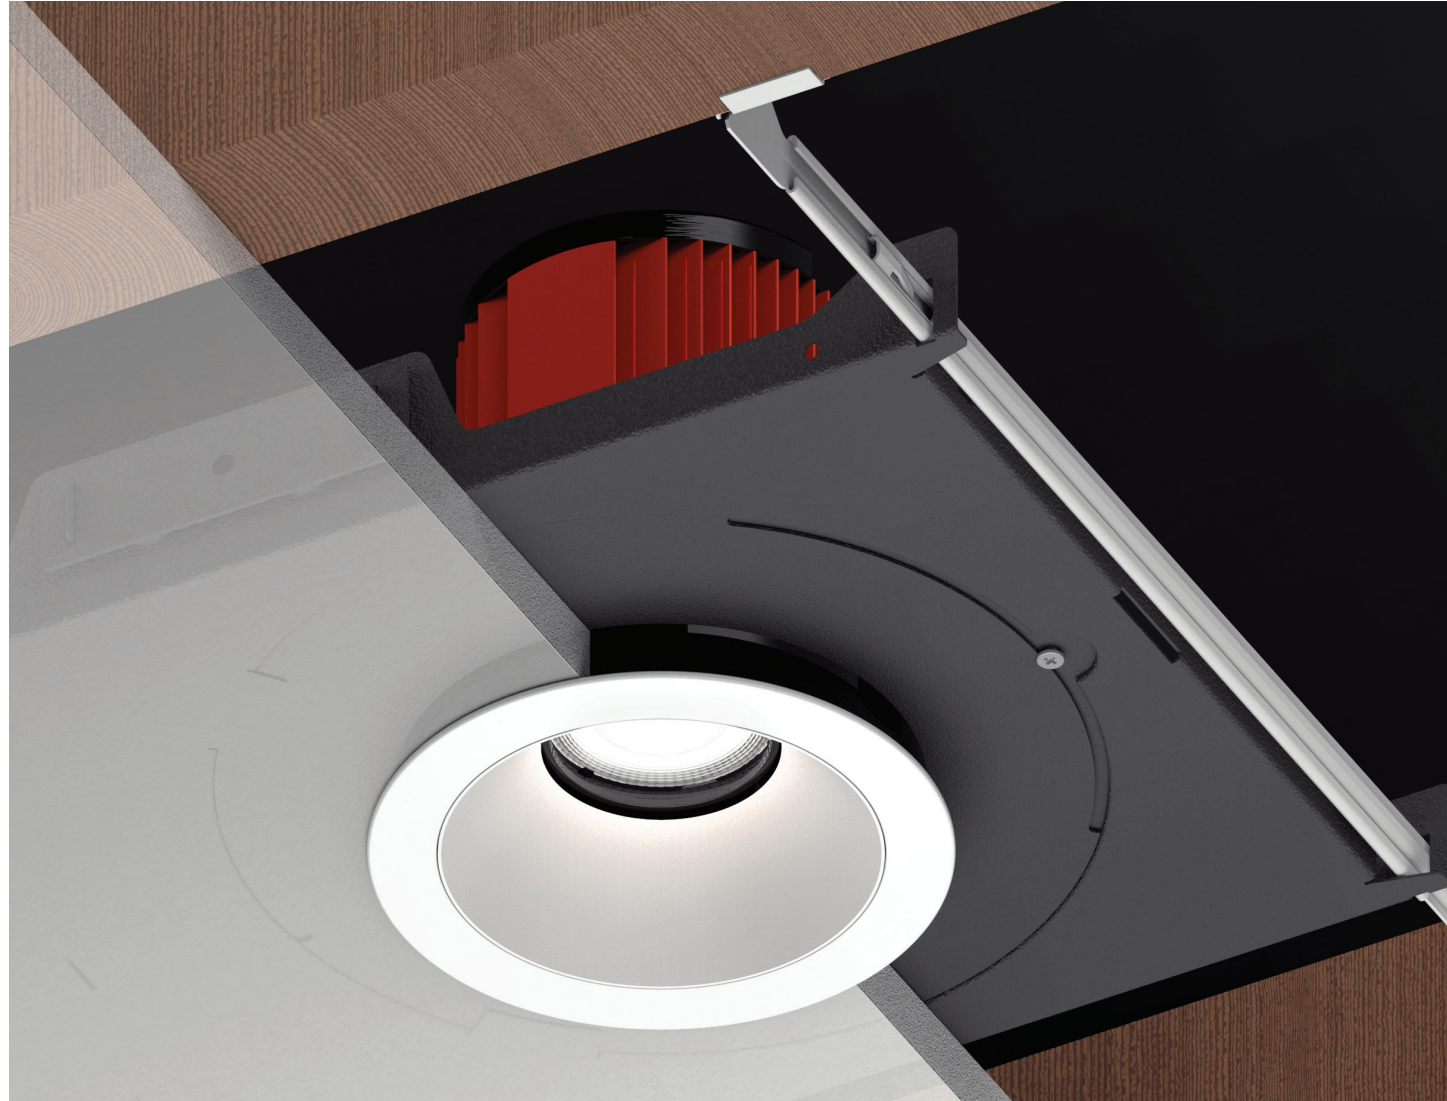

**Ultimate Performance in Wall Wash**  
Information and User Guide

# PERFORMANCE

The Acrobat recessed lighting system is the ultimate performer, engineered to deliver premium light quality and control in any application, to the most exacting standard.

Acrobat's light module installs separately from the housing at the end of construction. It easily adjusts up or down, independent of the housing, to guarantee a tight fit between the optic holder and the reflector to hide internal components and maintain a professional, clean look below the ceiling.

Acrobat LED modules house CSL's patented Silent Vu™ optics, a unique system that converges light output through the optic to provide quality light with minimal glare.

# PRECISION

Acrobat's light module installs separately from the housing, at the end of construction. It easily adjusts up or down, independent of the housing, to guarantee a tight fit between the optic holder and the reflector to hide internal components and maintain a professional, clean look below the ceiling.

BELOW CEILING ADJUSTMENT  
Lead Screw

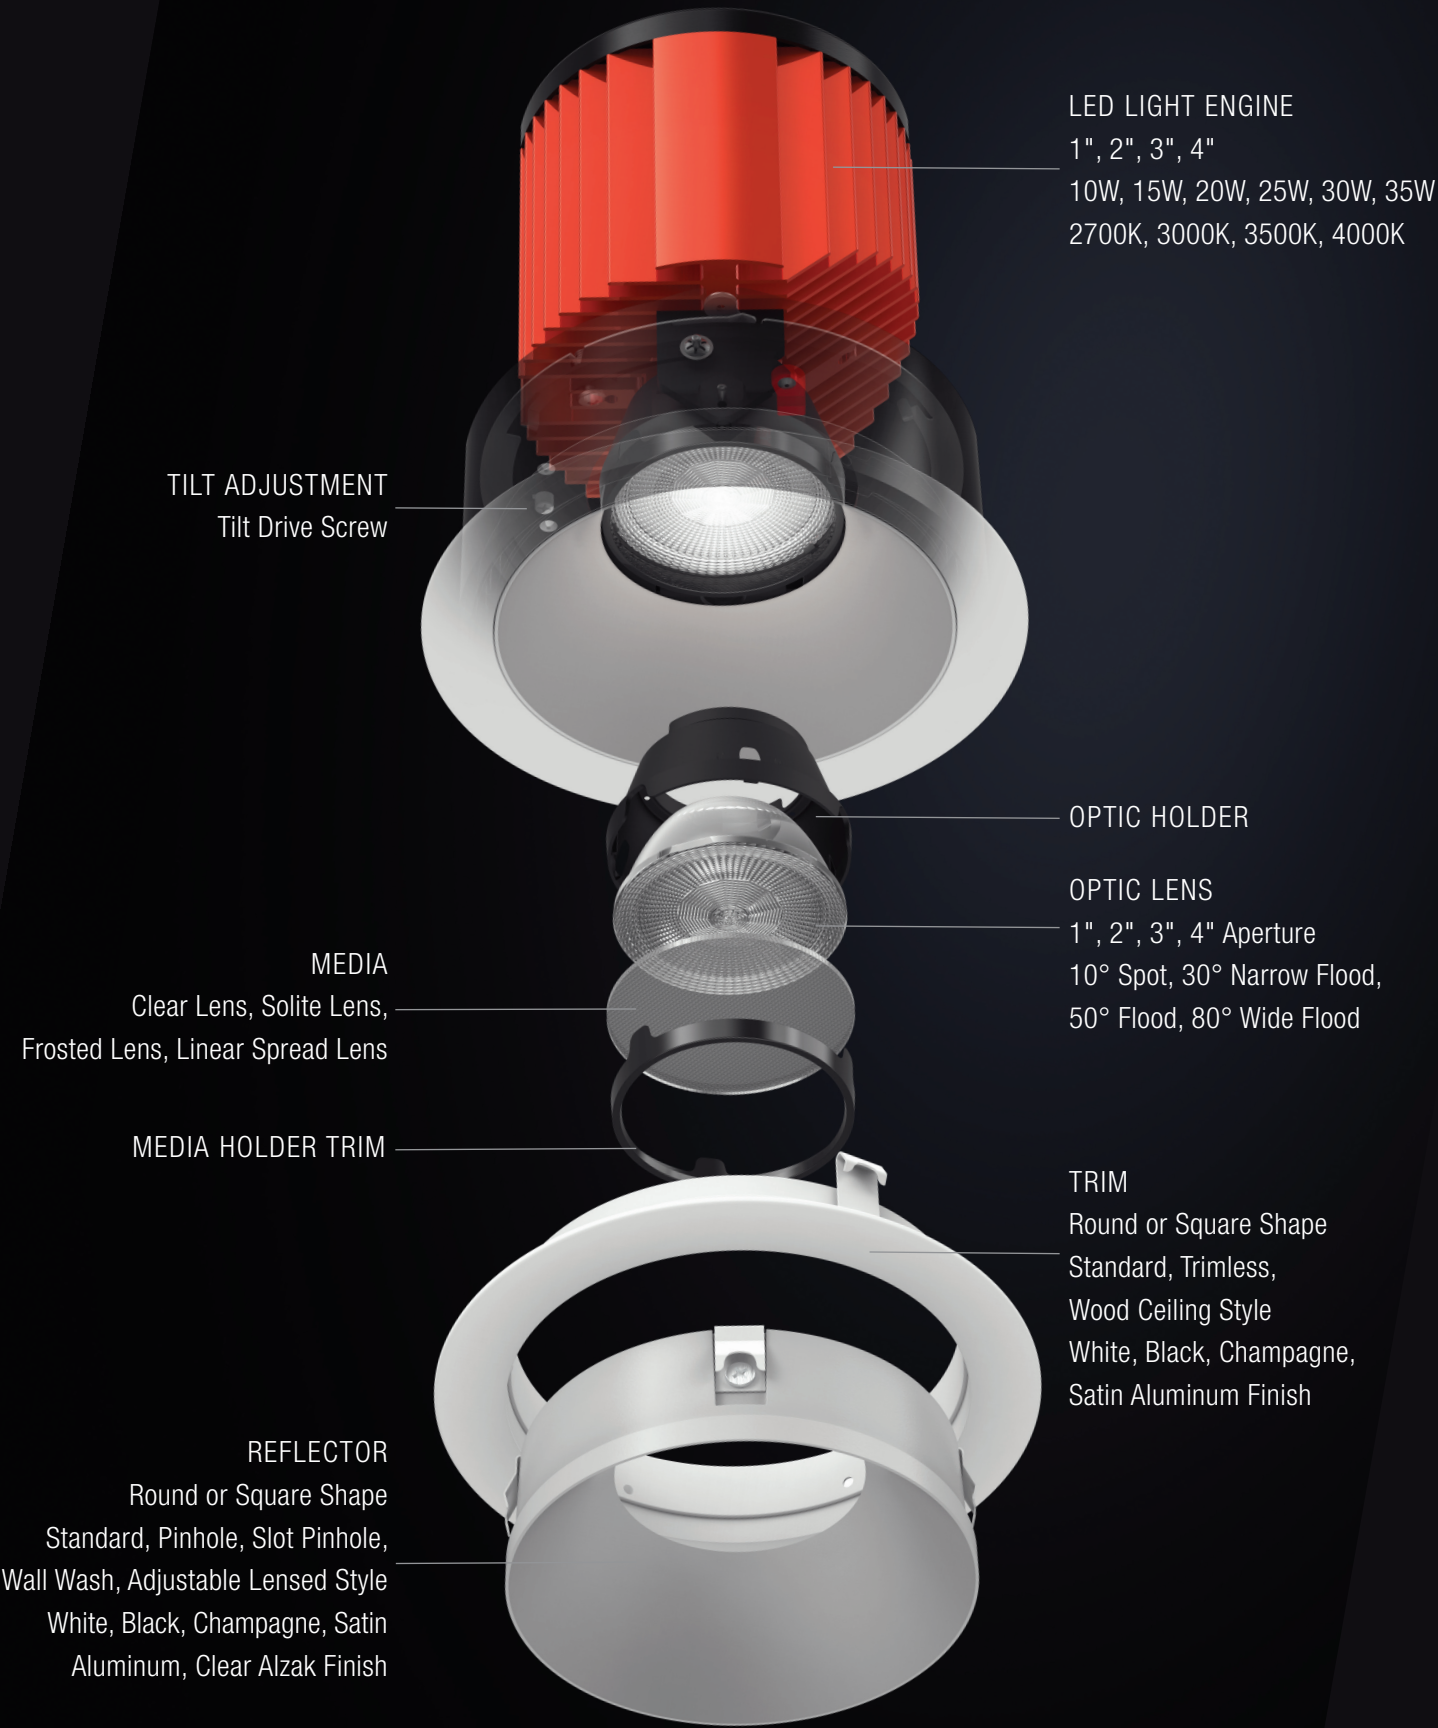

Adjustability is quick, easy, and precise. The light module rotates 360°. A twist of the custom lead screw tilts the module to the desired degree and locks it in place.

Fixed      Adjustable      Wall Wash

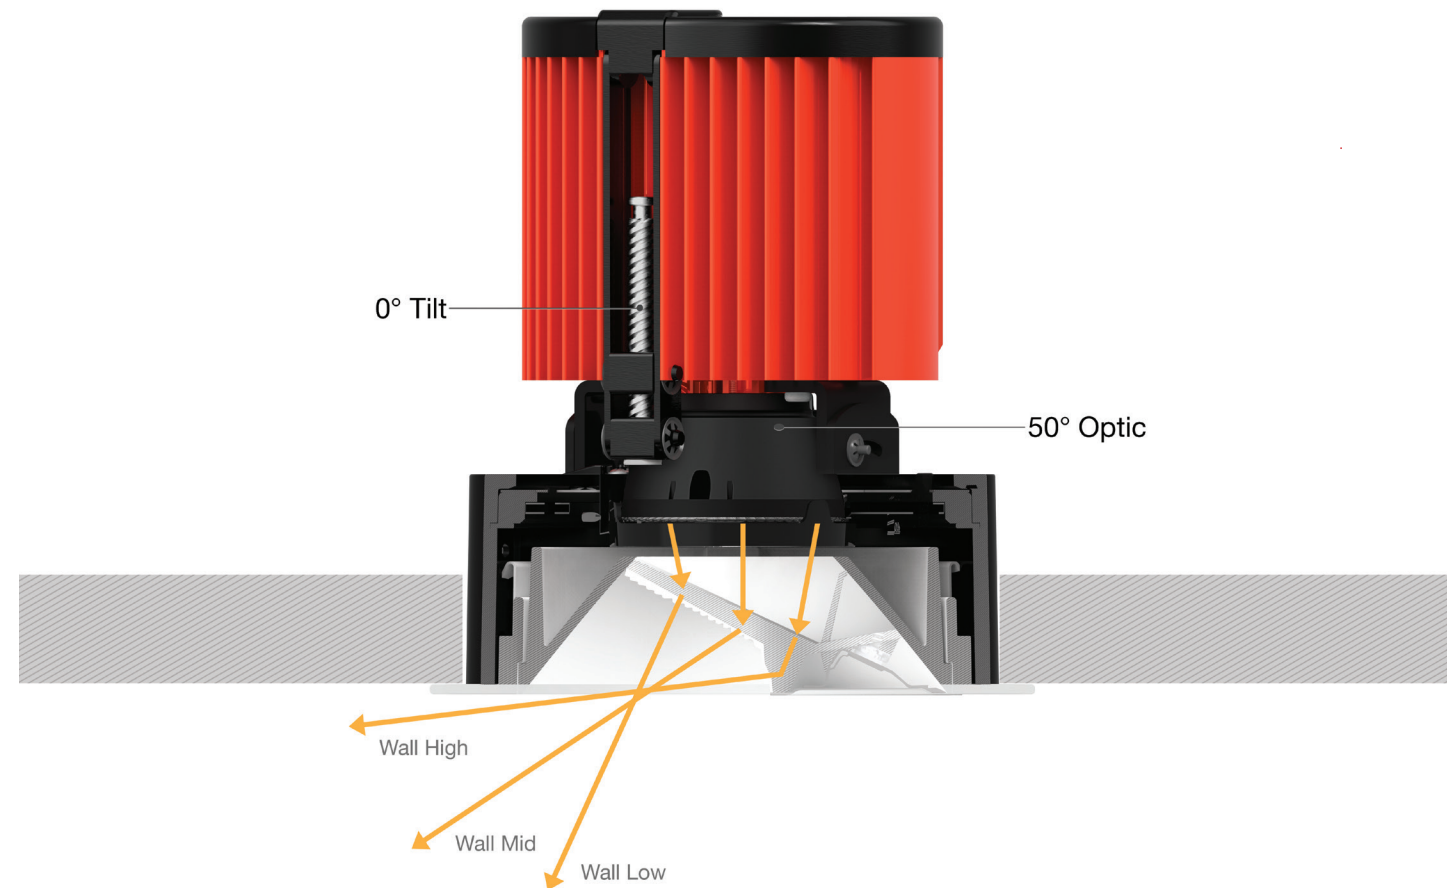

# DESIGN

## NEXT LEVEL PRECISION

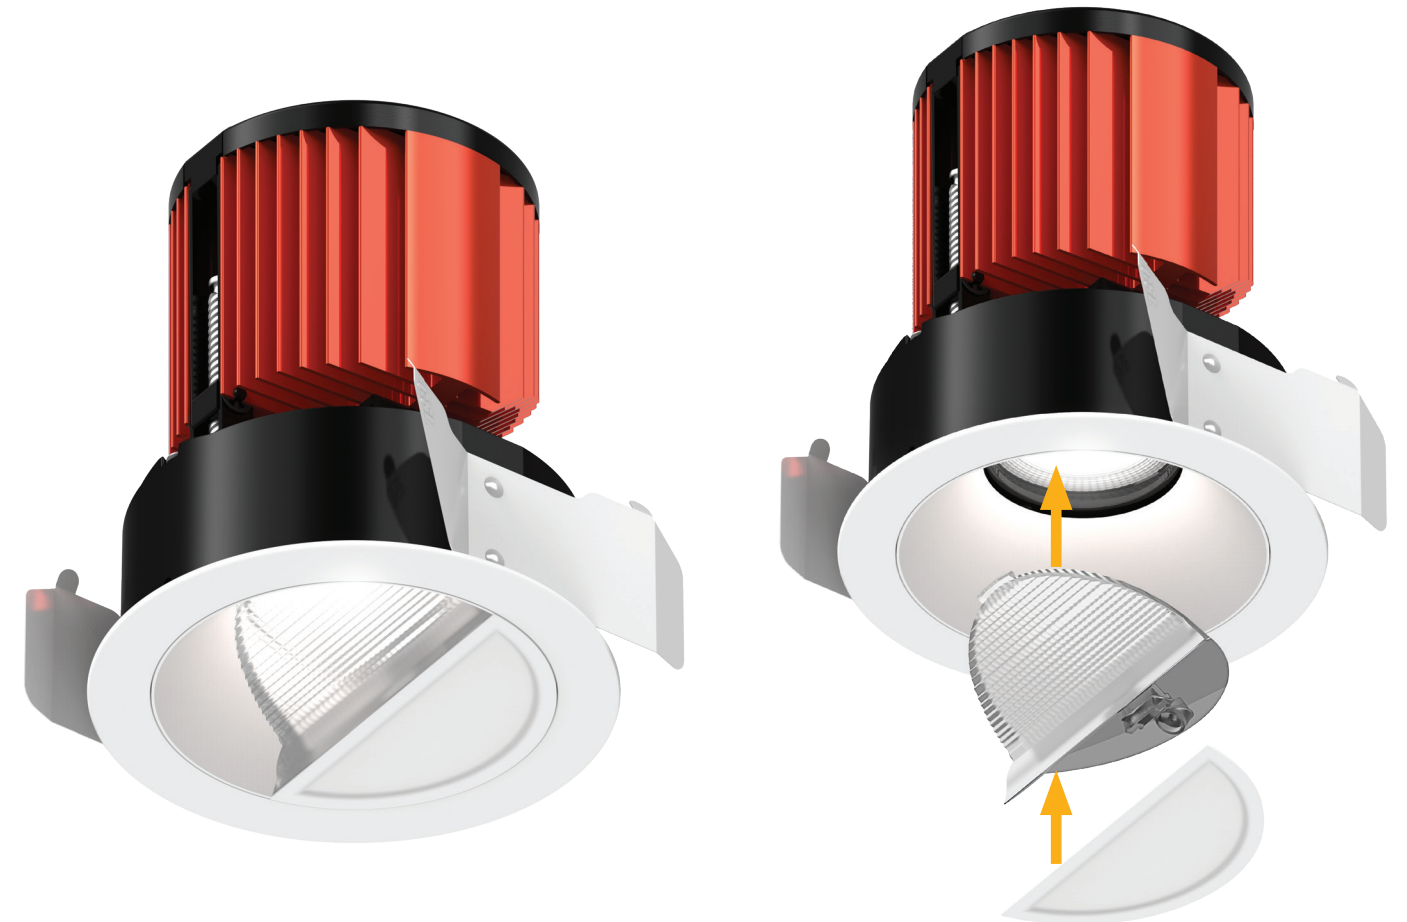

Acrobat Wall Wash Optic is an innovative new product that converts standard acrobat downlight trims to wall wash lighting. This newly patented technology goes beyond traditional track or downlights, delivering next-level precision when spotlighting wall art, sculpture, or signage.

50° Optic is positioned straight down (no tilt) and parallel to the wall; trim louvers redirect light rays toward the wall.

## SIMPLE INSTALLATION

The Wall Wash Optic is simply snapped into place and rotated to create directional light.

A metal cover snaps in behind it to maintain a superior below ceiling aesthetic.

# CONSIDERATIONS FOR ARTWORK

Example of a 36" tall painting mounted at 60" on center.

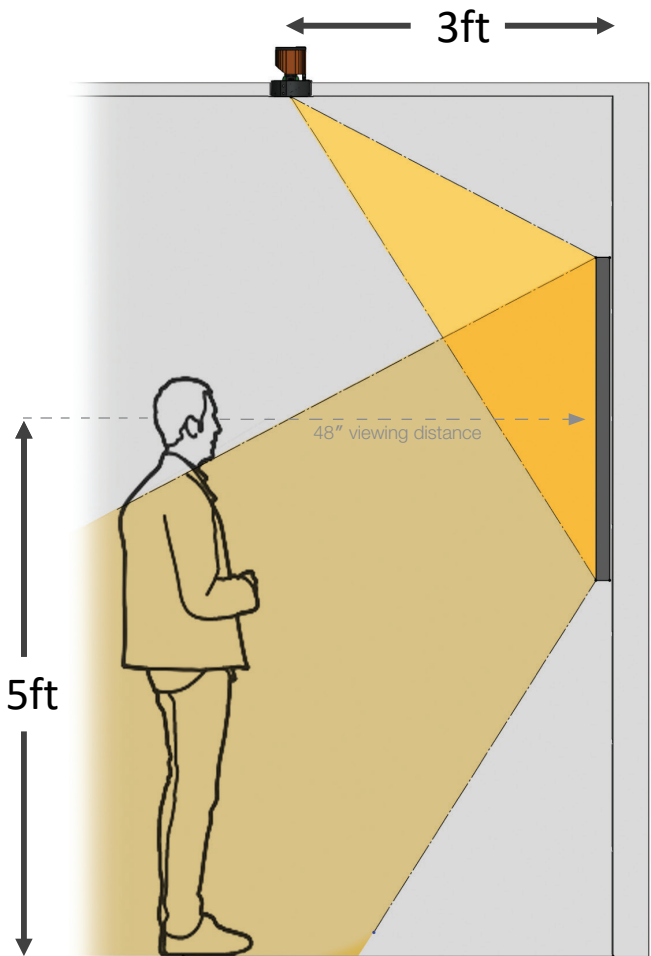

Light fixtures too far from the wall cause glare when viewed at eye level.

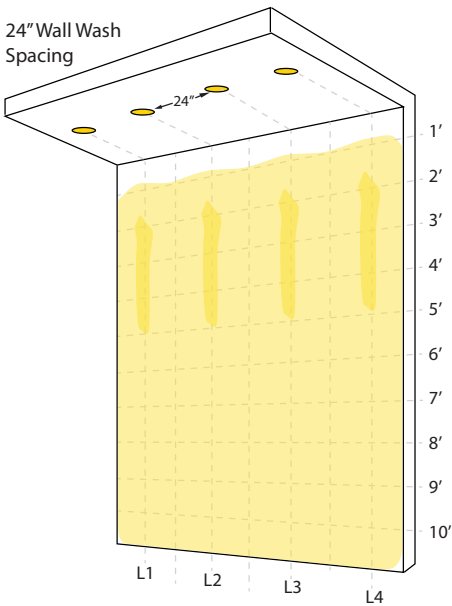

Here light fixtures are too close to the wall. This causes harsh shadows as well as over exposing the top and under exposing the bottom of art.

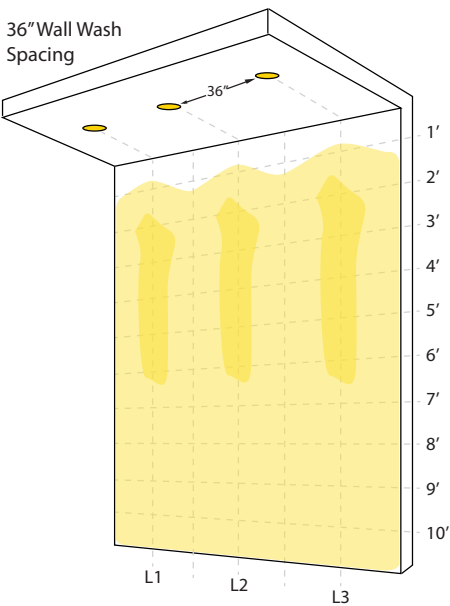

Light fixtures positioned at the correct distance of 3ft don't cause glare when viewed at eye level. At this distance, a painting can be evenly lit from top to bottom without harsh shadows.

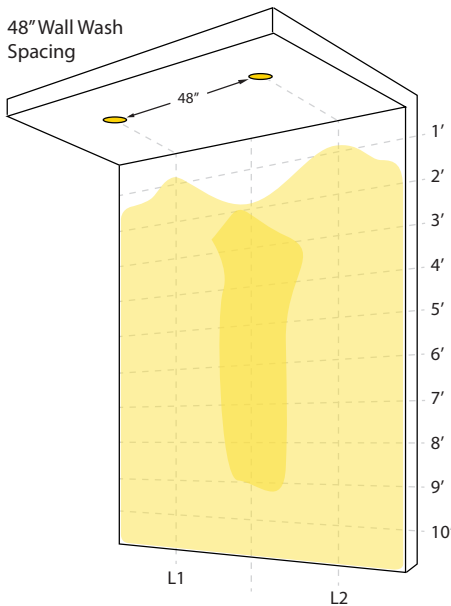

# CONSIDERATIONS FOR SPACING

Tighter fixture spacings minimize scalloping between fixtures and create the evenest wall wash possible. This however comes at the increased cost of more fixtures on a project. CSL recommends 24" fixture spacing if your budget allows.

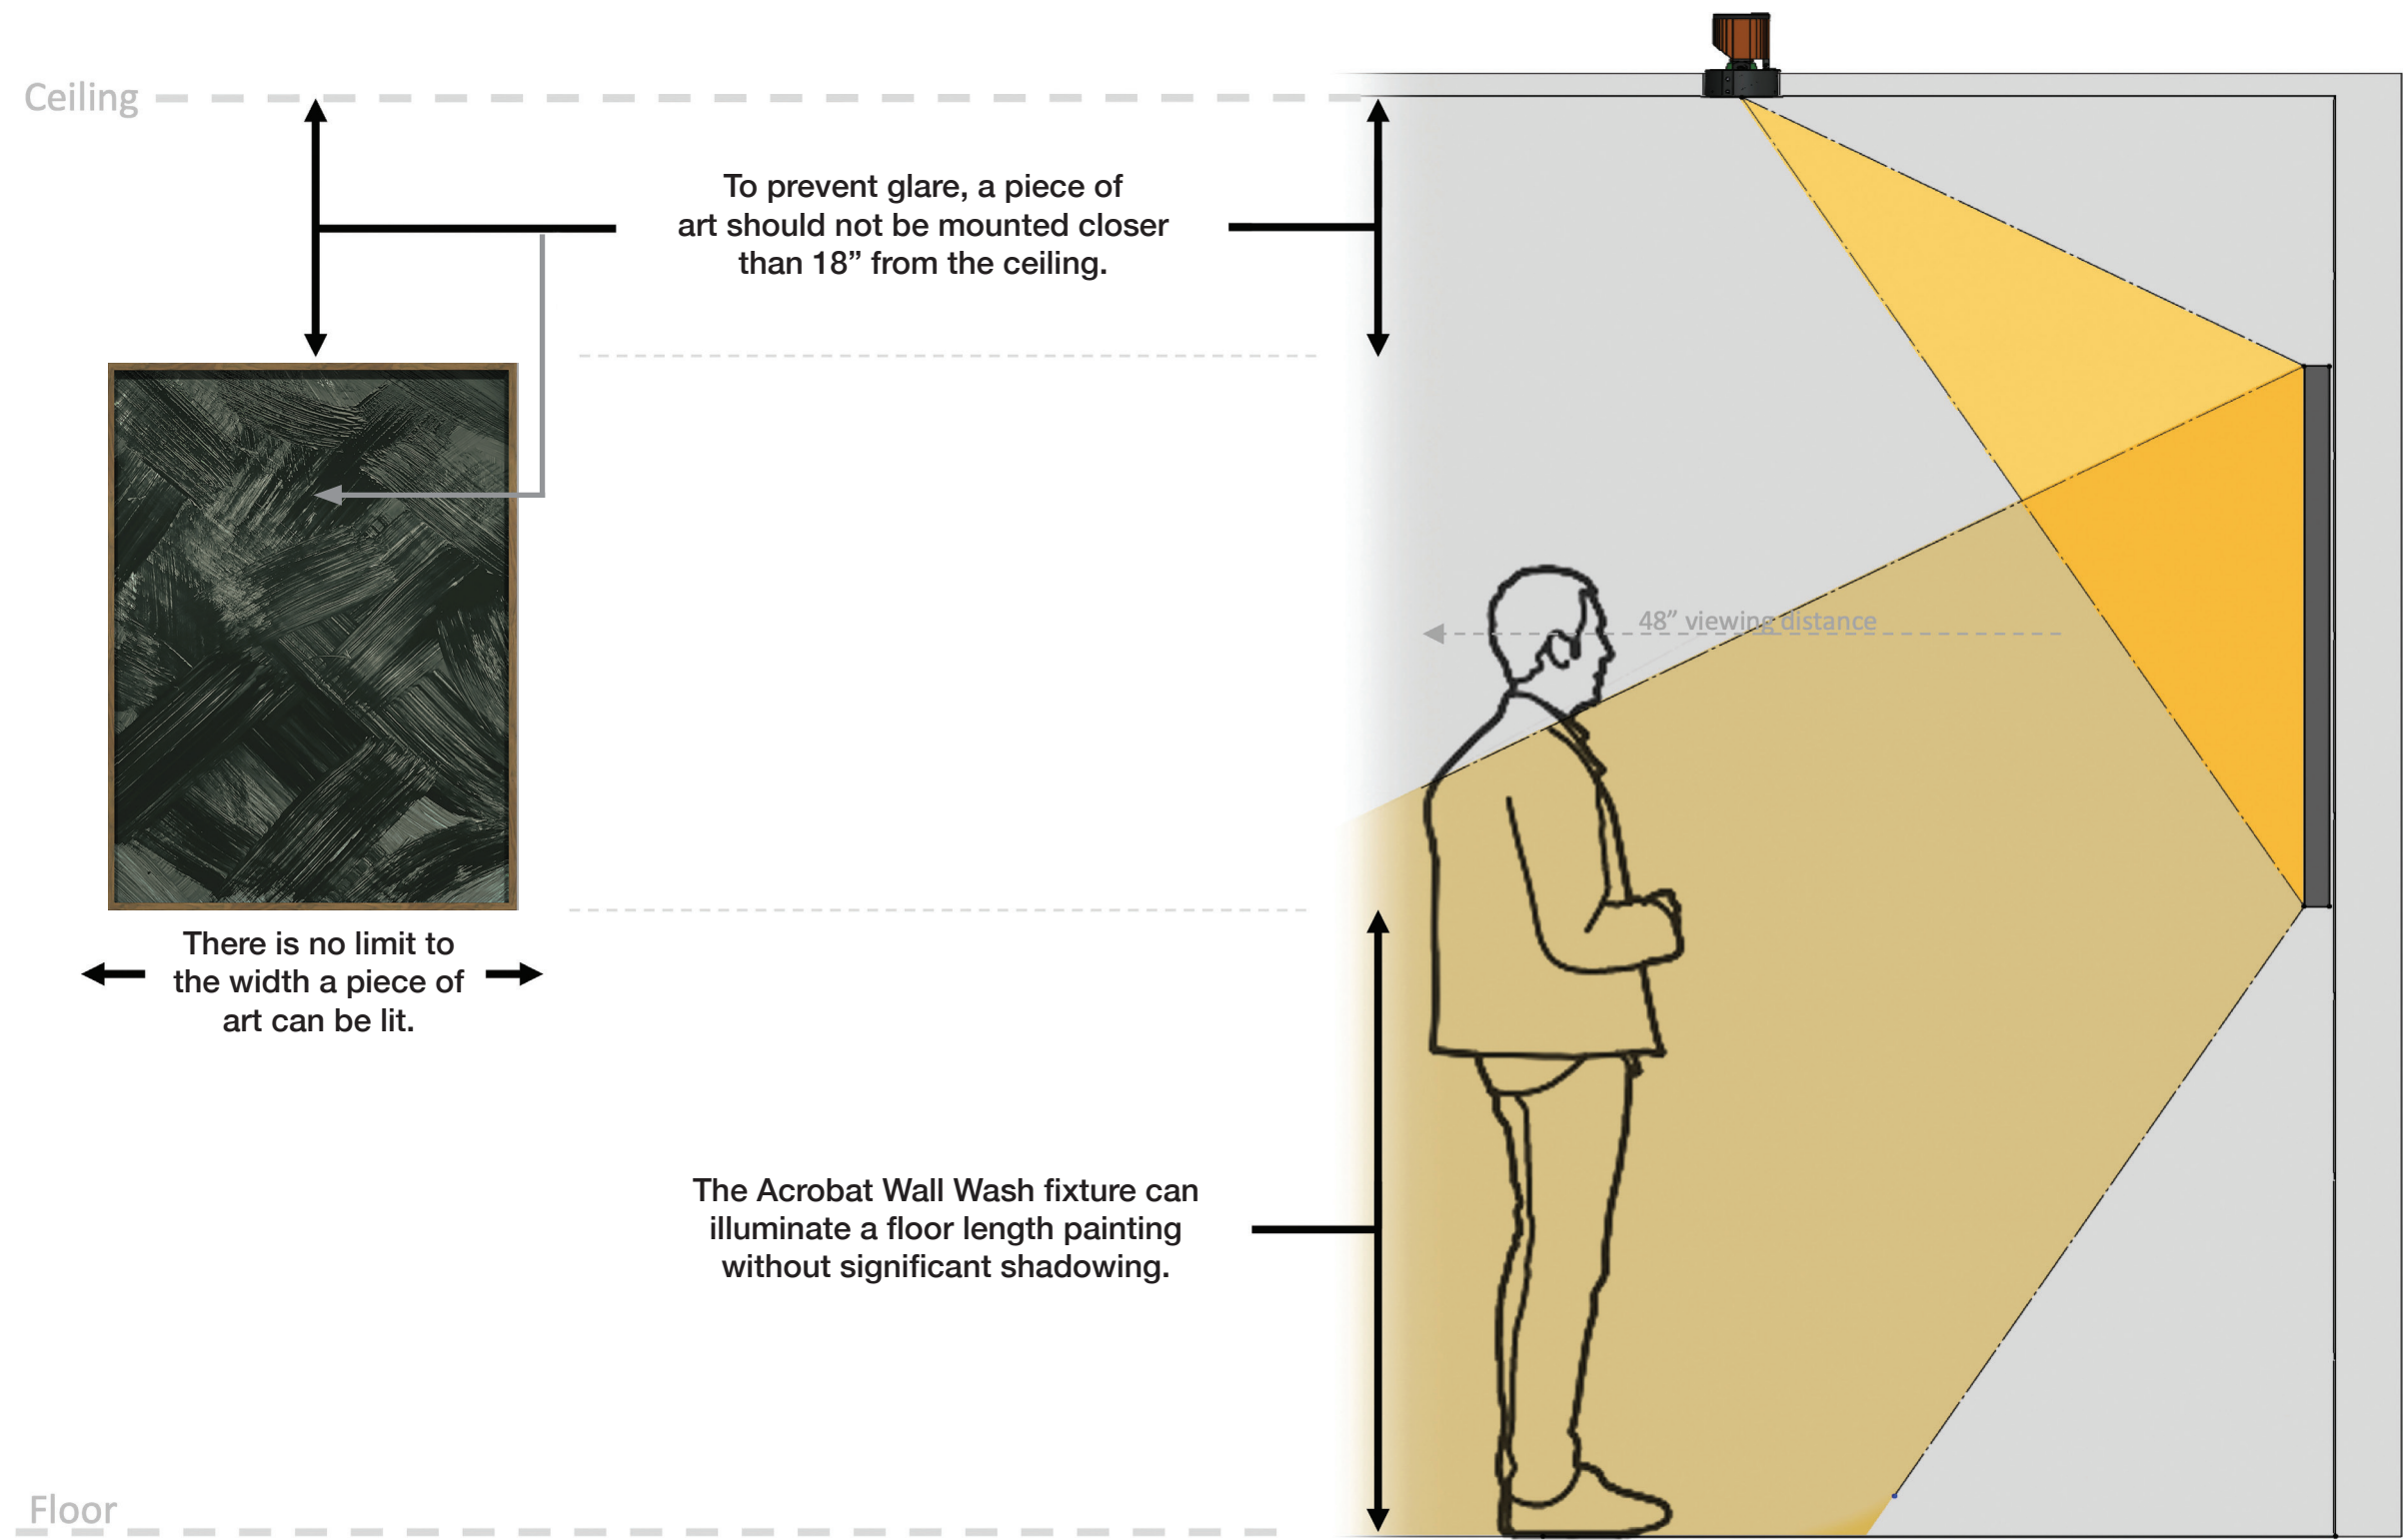

A 36" fixture spacing is a good compromise on minimizing scalloping and hot spots while still meeting the demands of a design budget. CSL recommends 36" fixture spacing for projects on a standard budget.

With 48" fixture spacing, hot spots and scalloping will be more obvious. CSL recommends a 48" fixture spacing on projects on a tight budget.

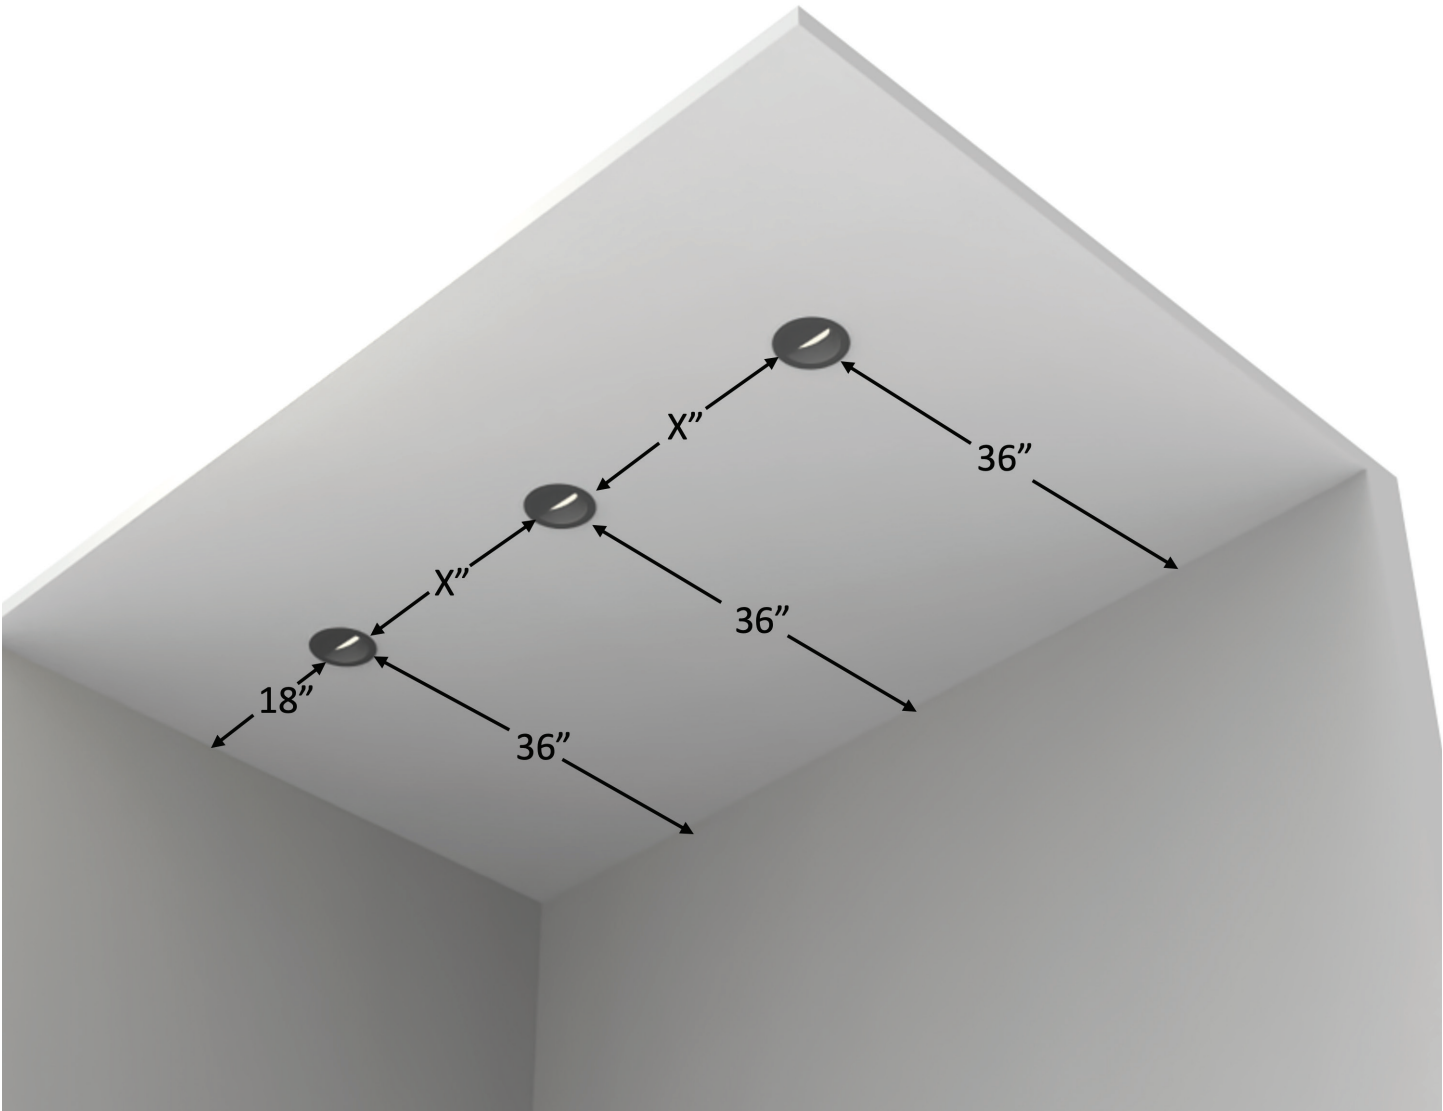

# PROPERLY USE WALL WASH FOR ARTWORK

Example of a 36" tall painting mounted at 60" on center.

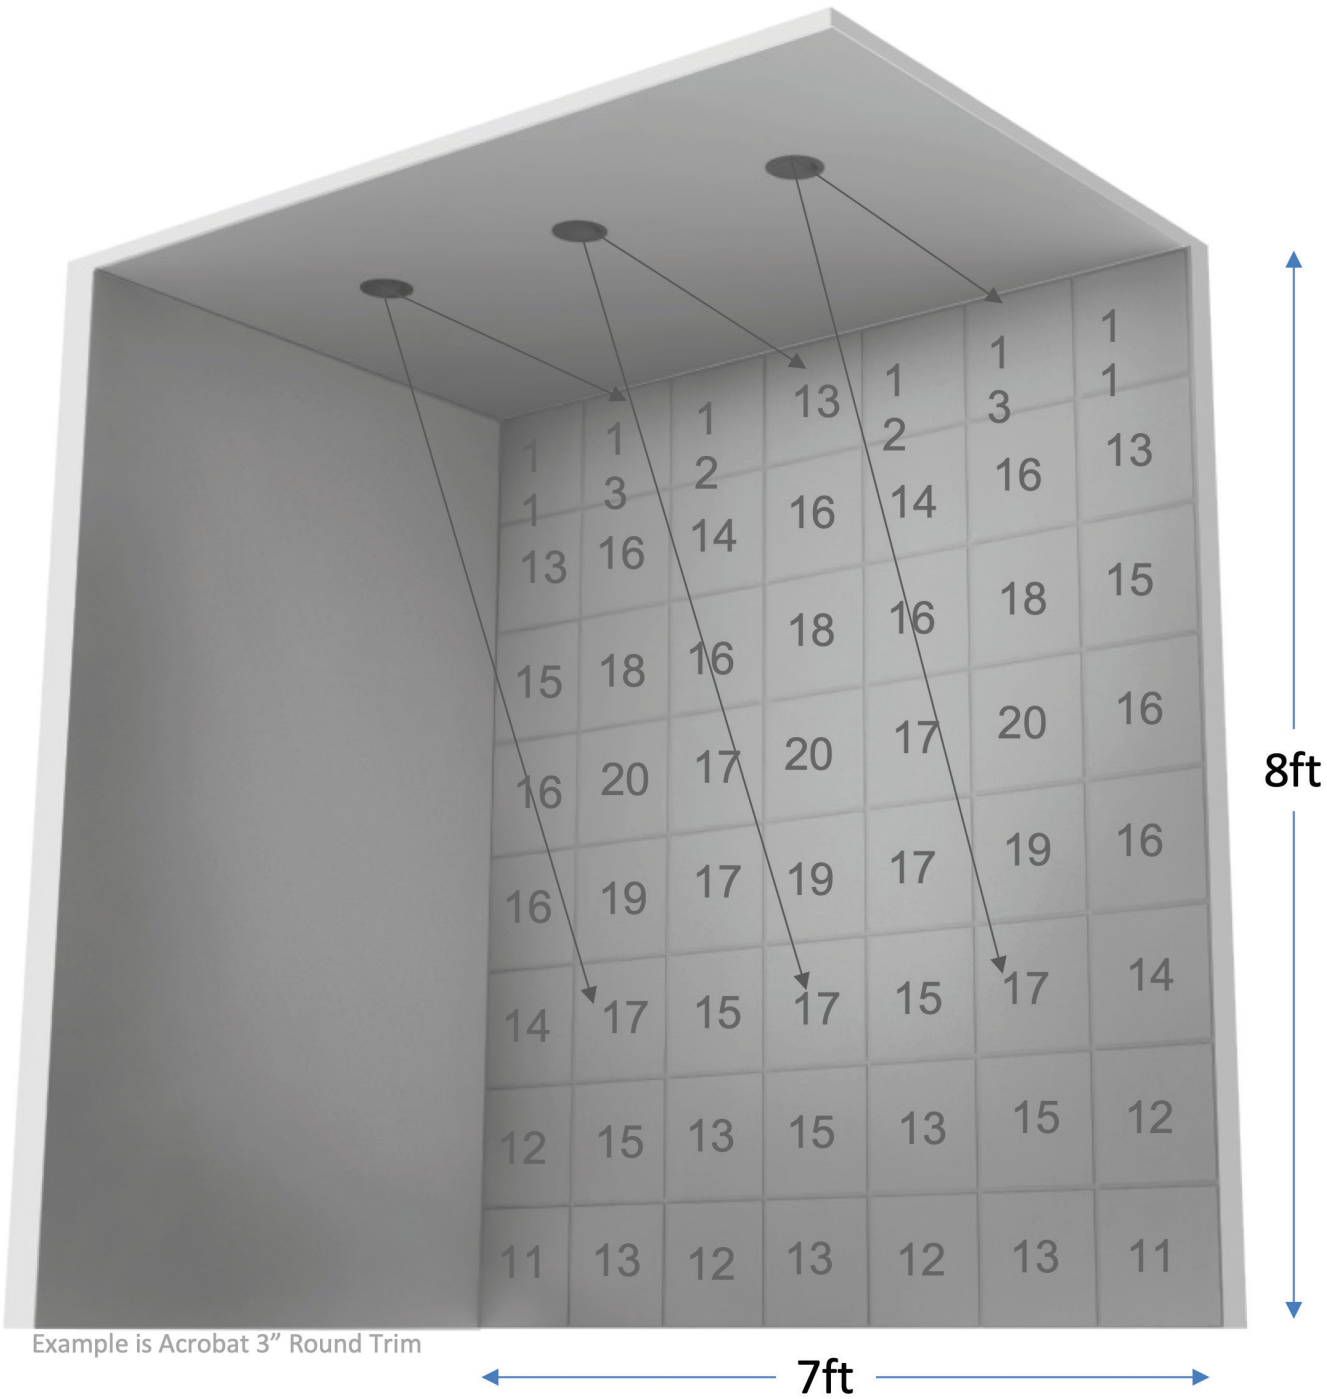

# PLACEMENT

Wall Wash optic is to be oriented parallel with the wall. Place first fixture in the row 18" from a perpendicular wall. Subsequent fixtures should be placed 24", 36" or, 48" apart. All fixtures should be placed 36" from the wall.

# RESULT

The Wall Wash optic assembly will redirect light facing down and have it redistributed towards the wall.

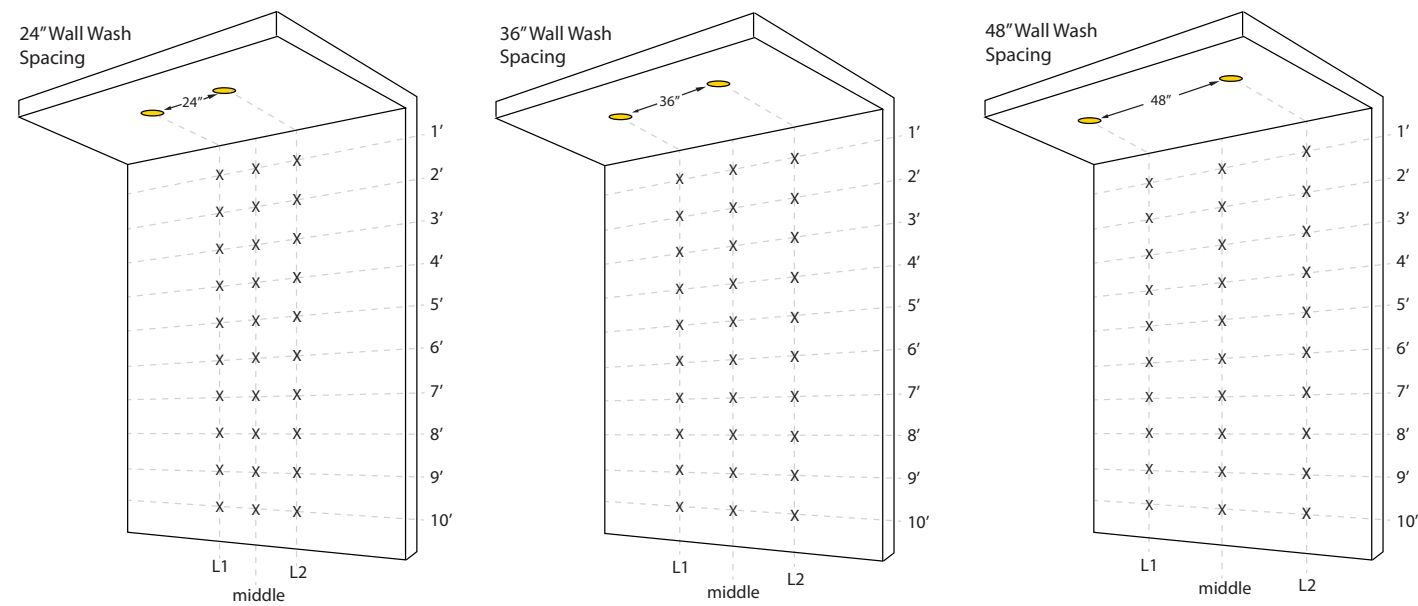

Example is Acrobat 3" Round Trim

ACROBAT 1" WALL WASH 15W

# HOUSING

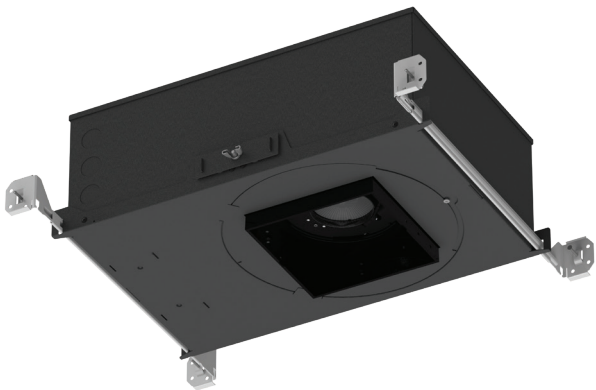

## NEW CONSTRUCTION, REMODEL

Acrobat's housings are designed and engineered to fit into tight spaces and optimize performance in any type of installation environment and ceiling material.

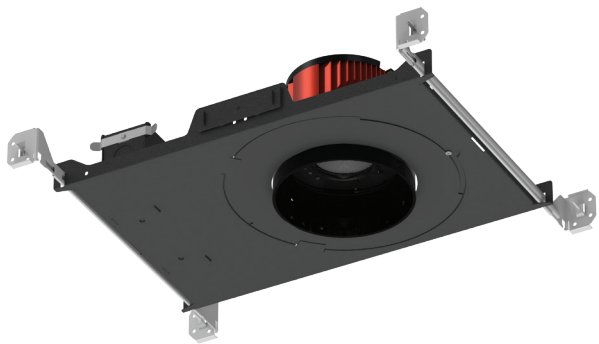

IC-R

Adjustable New Construction IC Housing - Round

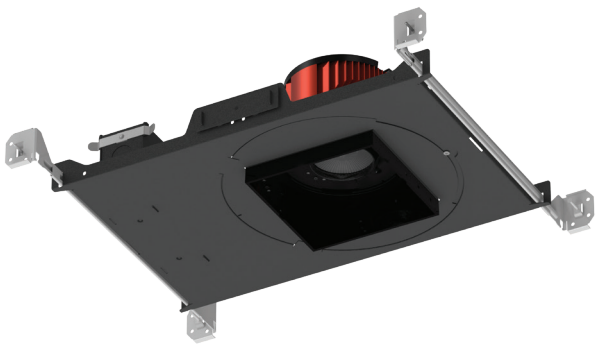

IC-S

Adjustable New Construction IC Housing - Square

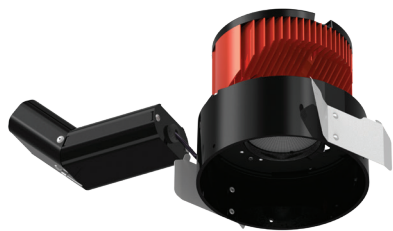

NC-R

Adjustable New Construction Housing - Round

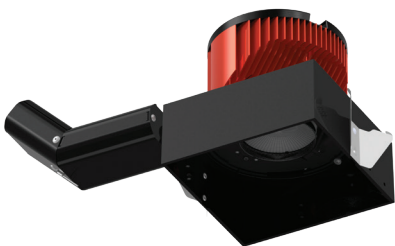

NC-S

Adjustable New Construction Housing - Square

RM-R

Adjustable Remodel Housing - Round

RM-S

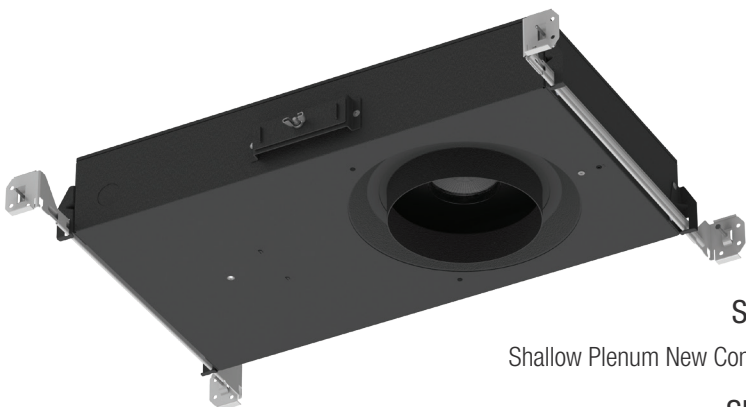

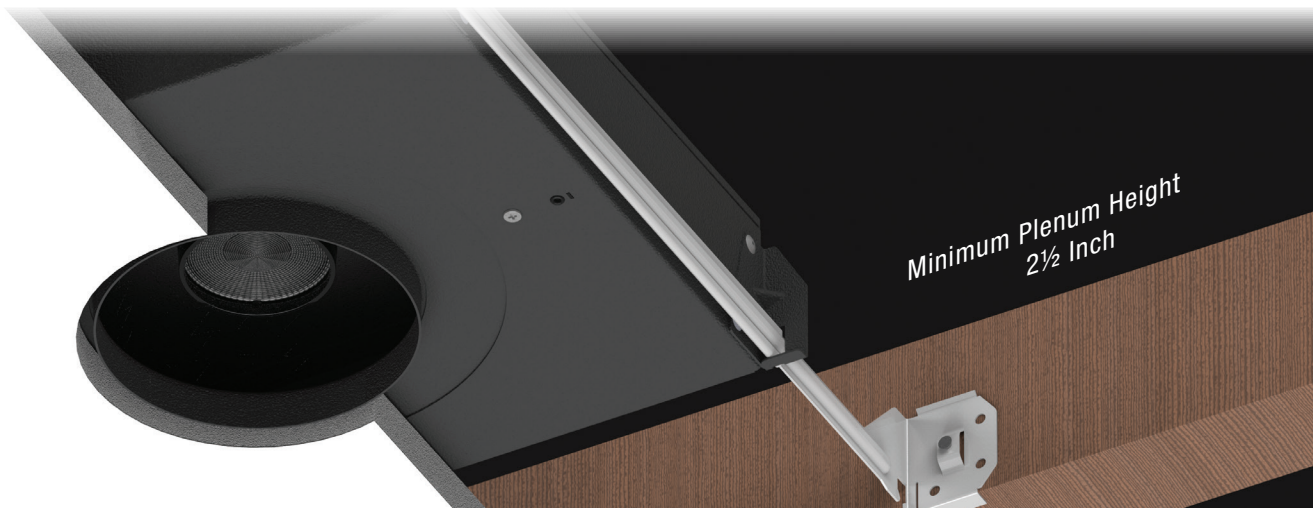

Adjustable Remodel Housing - Square

Some models may have limited options available. See specification sheet for details.

# HOUSING

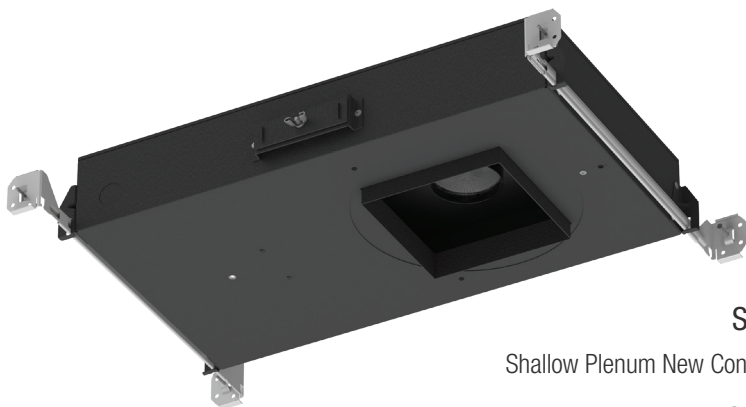

## SHALLOW PLENUM

Shallow plenum housings adjust to any type of ceiling. They come ready to install into 2½" plenums with IC, Air Tight, and Chicago plenum (CCEA) certifications.

SIC-R

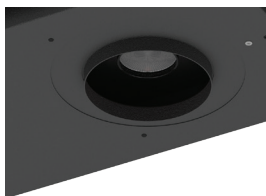

Shallow Plenum New Construction IC Housing - Round

SIC-S

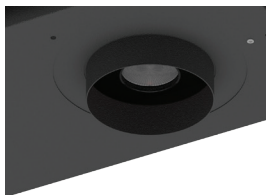

Shallow Plenum New Construction IC Housing - Square

### CEILING THICKNESS
