New architectural lighting products available for specification

 VISA LIGHTING

Sanibel

Sanibel is a sleek and modern lighting fixture with a unique curved design. It provides subtle illumination with its indirect uplight or downlight, creating a soft glow without being too noticeable. Sanibel comes in indoor, outdoor, and high abuse/behavioral health models, all of which come in either 14" or 26". It's available in various finish colors, which allow it to blend seamlessly into the wall for a clean, unobtrusive look.

BETACALCO

Oooh Linear Pendant

BETACALCO's unique louver system, **Oooh Linear Pendant** enhances traditional linear lighting. The louver system is designed in a tunnel shape and comes in 5 finishes, with options for glare control, higher reflectance, or design enhancement. The luminaire body is available in 12 finishes, including metallic and wood options, allowing customers to create a personalized and luxurious design. With this product, Oooh offers a simple way to transform functional lighting into a stylish feature.

Wall Wash Optic System

CSL Acrobat™ is a state-of-the-art wall wash lighting fixture that provides exceptional illumination with uniform light distribution, accurate color rendering, and reduced glare. Its modern design features a patented wall wash optic that snaps into the standard trim and can rotate in either direction for precise light placement. The decorative cover fits securely to maintain a polished ceiling appearance, available with a round or square standard trim.

SilentAir Plasma Air Disinfection Round 24" Air Purifier

SilentAir lights feature an internal circulation system that circulates plasma to neutralize harmful pollutants, pathogens, and odors. With coverage up to 1,378 sqft at 32ft height, it kills 99.9% of airborne viruses and bacteria, including SARS-CoV-2. Easy to install as a regular fan and controlled by wall switch.

TruTrack System

The **TruTrack® system** is an innovative two-circuit solution featuring magnetic track head connectors. It is a 24VDC two-circuit plaster-in recessed track system that enables independent switching and dimming for two groups of fixtures. Its patented design is only 5/8" thick and blends seamlessly with drywall surfaces, eliminating the need for joist modification and providing greater flexibility to make turns along the ceiling. A paintable slot cover in aluminum or steel is included for a clean, architectural look with only the track head visible after installation.

DENALI INTEGRAL POLE

B-K Lighting unveils the **Denali Integral Poles**, capable of mounting up to 4 fixtures in various orientations (horizontal, vertical or spiral). Available in pole heights ranging from 8ft to 20ft, the Denali Integral Floodlight utilizes 13W or 21W per fixture and can deliver nearly 6,500 total lumens with 4 fixtures. Choose from either a 4" round or square pole design, in aluminum or steel.
